Average elapsed time-to-degree was calculated as the number of fall, winter, and spring quarters (summer excluded) between entry and graduation divided by three.

Students graduating with multiple majors are counted in all majors and divisions in which they earned a degree. The divisional and campus totals are unduplicated headcounts (e.g., students with multiple majors in the same division are counted in each major but only once for the division. Students with multiple majors in different divisions are counted in each major and division but only once in the campus total).
